### **Management Perspective**

"We are pleased to report an improved financial performance during the quarter primarily on account of increasing export sales and restored demand from the domestic market. Our profitability improved significantly as a result of normalized impact of GST.

As a testimony to our in-house R&D capabilities we have recently received a patent for an anti-malarial drug. We are expecting meaningful contribution to the revenue from exports after the introduction of this drug in the African market.

Going forward, we are very optimistic about our business outlook supported by a strong export order book. Our investment in the USFDA lab and a new plant for antibiotics to cater to the domestic and regulated markets are expected to contribute to the growth of the Company in the near term."

Mr. Mahendra G. Patel, Managing Director
